LOUISVILLE, KY

Free Training

August 16 - 20, 2010

Monday - August 16th

Overview of the Kentucky OSH Program

8:30 - 11:30 a.m.

This session discusses the obligation to provide a safe and healthy workplace, free from recognized hazards. Topics of discussion include the operations of the Kentucky Occupational Safety and Health Program, including enforcement and voluntary compliance services, and safety and health topics currently being considered for future standards and policies.

Injury and Illness Recordkeeping

1:00 - 4:00 p.m.

This session is for those persons responsible for maintaining the revised injury and illness records. The forms 300, 301, 300A will be covered. The regulations and guidelines for recordkeeping will be discussed, as well as the compliance directive the Kentucky OSH compliance officer will use to evaluate your records. A recordkeeping example workshop will be part of the course, time permitting.

Tuesday - August 17th

Respiratory Protection

8:30 - 11:30 a.m.

This session discusses the various types of respiratory equipment available, the limitations and capabilities of the various types of equipment, and the elements of a minimally acceptable respiratory program. Also included is an outline of permissible circumstances where respiratory protection may be utilized and the regulations regarding its use.

Bloodborne Pathogens

1:00 - 4:00 p.m.

This session explains the measures that must be implemented to protect employees from the hazards of occupational exposure to blood and other potentially infectious materials containing bloodborne pathogens, such as hepatitis B virus, and human immunodeficiency virus. Topics of discussion include applicable definitions, infection control, engineering and work practice controls, including universal precautions, personal protective equipment, housekeeping; medical evaluations, warning signs and labels, and training of employees.

Wednesday - August 18th

Lockout/Tagout

8:30 - 11:30 a.m.

This session familiarizes the participant with Kentucky's lockout/tagout standard. It demonstrates the LOCKOUT and TAGOUT methods relating to the various hazardous energy sources associated with machinery, equipment, and processes used in industry. Topics addressed include training requirements, documentation required, hardware, and group lockout procedures.

Electrical Safety Related Work Practices

1:00 - 4:00 p.m.

This course is designed to familiarize participants with the Kentucky OSH's Electrical Safety-Related Practices standards 1910.331 - 1910.335. Topics include requirements for working on de-energized and energized electrical equipment, shock and arc flash/blast hazards, personal protective equipment and other NFPA 70E requirements.

Thursday - August 19th

Noise and Hearing Conservation

8:30 - 11:30 a.m.

This session explains the composition of sound, the instrumentation and criteria used to determine excessive noise levels, the effects of noise on the hearing mechanism, personal protective equipment, and basic noise control methodology. Also included is a discussion of the hearing conservation requirements. These requirements include employee exposure monitoring, audiometric testing, hearing protection, employee training, and related recordkeeping.

Developing An Ergonomics Process

1:00 - 4:00 p.m.

This session provides information, essential steps, and the tools to assist both small and large facilities in the development of an in-house ergonomics process. Class discussion focuses on how this process can help prevent work-related injuries and illnesses, and reduce the cost associated to them. Students learn how to use a blueprint that is specifically designed to help management and employees interact as a team, in establishing clear achievable goals, objectives, and action plans.

Friday - August 20th

Excavation, Trenching and Shoring

8:30 - 11:30 a.m.

This session is designed for those persons engaged in excavation work. It covers OSHA's requirements in Subpart P of the 1926 standards. Topics include soil classification and instrumentation, shoring techniques, trench boxes, a discussion of competent person, and associated hazards.
